Doctoral Seminar HCI Research & Analysis (3 Credit Hours)

IS & LT 9460 – Spring 2026

- [Course Schedule \(https://umsystem.instructure.com/courses/396063/pages/course-schedule\)](https://umsystem.instructure.com/courses/396063/pages/course-schedule)
- [MU Dates & Deadlines \(http://registrar.missouri.edu/academic-calendar/\)](http://registrar.missouri.edu/academic-calendar/)
- [SISLT \(http://sislt.missouri.edu/\)](http://sislt.missouri.edu/)

Instructor

Dr. Joi L. Moore

Professor

School of Information Science & Learning Technologies

221C Townsend Hall

Email: moorejoi@missouri.edu (<mailto:moorejoi@missouri.edu>)

Course Information

Course Overview

Human Computer Interaction (HCI) is a discipline concerned with the development and implementation of interactive computing systems for human use and with the study of significant phenomena surrounding these systems. This course provides an introduction to the HCI field, focusing on the application and adaptation of existing HCI theories and research to a range of interface and interaction design problems. HCI is an evolving science, and the course points the way to acquiring ongoing information on the field and also provides the groundwork for understanding future applied research papers.

Entry Skills

- Apply guidelines and standards for the design and evaluation of technology
- Collect user data and perform data analysis

Course Objectives

Upon completing the course, each learner will be able to:

- Identify the scope of issues affecting HCI
- Identify appropriate theories and models for HCI problems
- Perform a critical analysis of theories, methodologies, and research
- Apply appropriate HCI principles to the design and evaluation of interactive technology environments
- Observe users interacting with technology and diagnose problems using theoretical constructs
- Collect and analyze data related to an HCI problem

Class Meeting

Tuesday, 4:00 pm - 6:00 pm CT

In-person: Room 1, Hall Hall

Zoom Meeting Link: <https://umsystem.zoom.us/j/5738842797> (<https://umsystem.zoom.us/j/5738842797>)

Virtual Office Hours

You can meet in person or virtually via email by appointment. To do so, use the "Inbox" feature in the Canvas course.

Minimum Technology

At a minimum, you will need the following software/hardware to participate in this course:

- A stable DSL or cable internet connection, or a connection speed sufficient to fully participate in Zoom meetings.
- A webcam and microphone for participation in weekly meetings.
- Access to office software, including word processing software.

Note: This list represents the basic minimum technology requirements for all learners in the course. Other technologies, such as online collaboration tools, may be required depending on decisions made within your peer group and later in the course.

Course Textbook and Readings

There is no required textbook for the course. However, you will have access to the required readings on Canvas. The following are recommended websites to support the course:

- Interaction-Design Foundation (<http://www.interaction-design.org> ↗ (<http://www.interaction-design.org>))
- Usability Professionals' Association (<http://www.uxpa.org> ↗ (<http://www.uxpa.org>))

Note: Readings from journal articles and website resources will be assigned throughout the semester. The articles will be available in Canvas at least 1 week before the due date.

Grading

The following assignments must be turned in for a grade. It is your responsibility to submit these assignments by the due dates (listed in the Course Schedule)

Assignments and Points

Element	Points/ Percentage
Synchronous/ In-Class Discussion Activities	10
Critical Analysis (3)	15

Topic Presentation	5
Mini Project-Review	10
Research Project	
• Research Project Proposal	11
• Final Project Paper	25
• Final Project Presentation	10
• Project Updates	4
Peer Evaluations (Topic Presentations and Research Projects)	10
Total	100

Assignment due dates may change as the semester progresses, and brief descriptions of each element are provided in the Student Responsibilities section of the syllabus. Detailed instructions and assessment expectations will be provided. Generally, the rubrics will determine whether the assignments contain the basic requirements and demonstrate solid work.

To receive an "A" for this course, however, your work must exceed the basic requirements of the assignments and demonstrate solid work. All assignment scores will be calculated to the first decimal point, and there will be no rounding of scores. The final course grade will not be rounded.

Grading Scale (Percentage)

Letter Grades

A+: (100-97)	A: (96 - 93)	A-: (92 - 90)
B+: (89 - 87)	B: (86 - 83)	B-: (82 - 80)
C+: (79 - 77)	C: (76 - 73)	C-: (72 - 70)
F : (69 - 0)		

Course Topics

General Plan of Course Topics

Week	Topics
1: January 20	• Introduction to HCI
2: January 27	• Theories and Studies

3: February 3	• Design Process • Research Methods
4: February 10	• Cognition Models and Theories
5: February 17	• User Experience • Learner Experience • AI in HCI
6: February 24	• Information Processing • Information Visualization
7: March 3	• Task Analysis • Activity Theory • Ergonomics
8: March 10	• Visual Design/ Aesthetics • Emotional Experience/Captology
9: March 17	• Universal Design • Culture and Inclusivity • Ethics
11: March 31	• Social Computing • Ubiquitous/Pervasive Computing

Student Responsibilities

You will receive specific, detailed instructions on how to produce and turn in the projects in the online course material during the semester. Links to the guidelines will be provided in Assignments, where you will submit your work.

File Naming Policies

All work submitted for grading must include the student's last name and first name initial, along with the assignment name as part of the file name. For example, "moorej-interaction1.doc". Also, the student's name must appear on the first page or in the footer.

Working in Teams

In the "real" world, design and development projects are typically collaborative and team efforts; this is a significant reason why you are working in teams for the portfolio. Additionally, the project constitutes substantial work for a team and, therefore, for an individual.

Being a committed, active team member is essential to individual and team success. Also, everyone must recognize that there are different working styles — some people wait until the last minute to complete their tasks, while others complete their tasks well in advance of deadlines. Be accepting of those individual differences, and if you feel that your working style may be impeding the work and progress of the team, talk to your team members about strategies that will work for the team and/or be flexible; for example, do not wait until the last minute, as might be your general tendency.

If you feel strongly that you will not be able to fully commit to a team for this project (e.g., due to major work or family responsibilities, extensive travel with limited internet access, or other circumstances beyond personal preference), please get in touch with me ASAP. We will determine a project for you to focus on for this course. You will be held accountable to the same standards as if you were working in a team.

Students will work in teams of 2-3 people. Students will evaluate each team member's overall contribution and performance, which will be calculated into individual grades.

Modules

A module provides an overview of activities and instructional content. It comprises one or more chapters from the required textbook and/or additional material provided on the course website.

Class Participation

Participation and idea sharing are integral to this course's success. The goal is to create a collaborative learning environment that helps everyone meet learning expectations. Throughout the semester, you are also expected to attend each class and actively participate in discussions and class activities. You are expected to have thoroughly read all required materials and to summarize and debate points in Zoom, face-to-face, and online discussions.

Throughout the semester, we will discuss HCI concepts, review articles, and engage in peer presentations. As part of a learning community, you are to provide insights, experiences, theories, literature, etc., as they relate to topics. The minimum number of FTF classes required to participate is 9, without penalty. However, you should strive to participate in all of the class discussions.

Critical Analysis Tasks

There will be three brief critical analysis activities to demonstrate your understanding of a topic, theory, model, or related material. The analysis includes: Thesis statement for argument(s), examples to support the argument that is described, a visual representation to support/explain your argument, and references—maximum 500 words.

Topic Presentation

Each student will be required to lead one class discussion on a research article related to a course topic. This will entail providing a short presentation (8-10 minutes) and accompanying activities (5 minutes) to illustrate the subject.

Mini Project

You will provide an analysis and/or design recommendations for an interaction problem based on concepts, principles, and methods discussed in the course. Information to include: problem analysis based on preliminary data collection and recommendations. In addition, a low-fidelity design prototype is required to represent the recommended functions.

Research Project

You will implement a research project for an issue relevant to the field. Project activities include the design of the research methodology, data collection and analysis, and the preparation of progress reports. A project paper will be prepared as a manuscript for submission to an HCI journal or conference proceedings. Students will evaluate the overall contribution and performance of each team member, which will be calculated into individual grades.

Research Project Presentation

The presentations will provide an opportunity for everyone to showcase HCI projects and discuss methodologies and findings. All team members are expected to participate during the team presentation.

Peer Evaluations

Each student shall provide peer evaluations for the Topic Presentations and the ***Research Project activities***.

Note: All writing assignments must follow APA formatting guidelines. Specific instructions for length and focus will be provided.

How To Succeed

Here are some tips for getting the most out of this course:

Effort: This is a doctoral seminar, quite different from the experience you typically have in other graduate-level courses. The project-based nature of the activities, coupled with the demands of Internet-based learning, can require considerable time.

Format: Classwork in an Internet-based course is structured differently from that of a weekly, face-to-face course. Therefore, managing the course responsibilities may seem overwhelming. However, if you manage your time wisely, you should be able to complete all activities by the due dates.

Weekly Announcements: Read the Announcements each Tuesday for tasks and course updates.

Activities: The Course Schedule provides a general outline of weekly activities. However, these activities can vary depending on students' needs. Thus, the Instructor may assign additional readings and/or tasks to support your activities. You should check the course schedule each Tuesday and check the discussion board at least once a day.

Pace: Maintain a reasonable pace throughout the course. Do not wait until the last week to begin working, or until the day before an assignment is due. Create a schedule for yourself that outlines when you will focus on the course topics each week.

Interaction: Frequent interaction with classmates is an essential component of a hybrid online course. Get to know your classmates. Take advantage of the opportunity to learn about your classmates and let them know about you. Contribute by writing about yourself and also by responding to what others write. Forming a community with your fellow students will make the course more enjoyable and will aid your learning.

Collaboration: Work collaboratively. How much you learn and how much you enjoy this course will depend on the sense of connection you develop with your fellow students. Try to help your fellow students and benefit from what they have to offer.

Discussion Board: Check the discussion board often. I encourage you to share ideas and ask questions. I will sometimes provide valuable tips and strategies. Make sure that you review the discussion board for similar problems and questions before posting for help.

Learning: Check your understanding. Your goal is to understand the theories, principles, development, and concepts central to the course. Do not stop reading the course materials. Always review the underlying concepts and interact with your peers to see if you need to strengthen your understanding.

Help: Post questions regarding assignments and activities on the discussion board. The Instructor will respond for everyone to view. For personal questions regarding grading, send a private message to the Instructor.

Course Policies

Reviewing Student Work

Many online courses require you to present your work electronically so other students can see it; you will also be asked to review other students' work as part of the class's instructional process.

Your work may be used as an example of how to accomplish a technique or as an idea for other students. In many cases, having other students review your work helps support your learning and leads to better outcomes for everyone in the course.

If at any time you feel uncomfortable sharing your work or receiving feedback or comments from other students, contact the Instructor as soon as possible.

To protect student privacy and prevent the inappropriate or illegal use of student work, you are not allowed to distribute links or files of your peers' work to anyone outside the course. Viewing peer projects is only for students enrolled in the course and is intended to support learning activities.

Feedback

You may receive feedback on all of your work. If you want feedback before an assignment is due, you **MUST** request it at least 2 days before the due date to allow enough time for feedback and for you to implement suggestions. No matter what, you should

always use your classmates' knowledge base when you have a question or need help. Post to the discussion boards and ask for feedback from your classmates.

Feedback for all submitted assignments will be available in the Assignments section of Canvas unless otherwise noted.

Late Work

The due dates listed for assignments may change as the semester progresses. However, it is essential to note that late work will be penalized. If you have conflicts, problems, or something unexpected arises, do not hesitate to contact the Instructor, facilitator, or mentors. Submitted assignments will be reviewed and graded immediately after the posted due date. Assignments submitted within **2 days** after the due date will receive an automatic **10%** reduction in grade. Work will not be accepted after 2 days, and you will receive an automatic zero. If you are having problems completing an assignment, please contact the course facilitator as soon as possible, before the due date. Otherwise, the assumption will be that you chose not to submit your assignment.

Note: Internet, computer, or technical problems are not valid excuses for late assignments. Make sure that you have a backup plan for accessing alternative computers to complete and submit assignments.

Regrading Policies and Procedures

Requests for regrading should be submitted via email within 48 hours of receiving the grade for each project. Write an email with a clear, detailed statement explaining which part should be reviewed and why you are requesting a regrade. If your statement is not appropriate, your request will not be honored. After a regrading, you may receive a higher grade, the same grade, or a lower grade, depending on whether the same grading standard had been applied to your work before the review.

Incomplete

Incompletes in this course will be given if, and only if:

The completed portion of the student's work in the course is of passing quality and

There is such evidence of hardship that it would be unjust to hold the student to the limits previously fixed for completing their work.

If you meet the above criteria and wish to receive an Incomplete in this course, you must immediately email moorejoi@missouri.edu (<mailto:moorejoi@missouri.edu>). In most cases, an Incomplete will result in an automatic drop in a letter grade. Requests for an incomplete must be provided two weeks before the Final Project due date.

If no specific agreement is established between the Instructor and the student, all course assignments and projects must be completed and submitted for grading before the start of the next semester; otherwise, a letter grade F will be given for the course.

For more information on Incompletes, please visit the [Registrar's website](https://registrar.missouri.edu/). (<https://registrar.missouri.edu/>)

Course Withdrawal

Withdrawals will adhere to university policies regarding dates and grades. If a withdrawal request is submitted before the university due date, a student will receive a W for "passing" status in the course. Otherwise, an F will be reported.

For more information on Withdrawals, please visit the [Registrar's website](https://registrar.missouri.edu/) (<https://registrar.missouri.edu/>).

Disabilities and Accommodations

The University of Missouri's goal is to ensure an inclusive learning environment for all students. [The University of Missouri Disability Center](https://disabilitycenter.missouri.edu/) (<https://disabilitycenter.missouri.edu/>) Provides services and accommodations for students to participate fully

in the learning experience and to experience equitable evaluation of their performance. Students (including online students) with a documented disability can contact the Disability Center to establish an Accommodation Plan. Documented disabilities include *hearing, vision, mobility, learning and attention, psychological health, and physical health*. Students' accommodations are implemented with the input of students to maximize the learning experiences. The MU Disability Center keeps information about a student's disability confidential.

Please notify me of your eligibility for accommodations as soon as possible. Additionally, if aspects of the course present barriers, such as inaccessible course content (e.g., learning assessments, PowerPoints, non-captioned videos, images, tables, PDFs), or if you need immediate accommodation due to an injury, please contact me or the Disability Center as soon as possible.

Mental Health

The University of Missouri is committed to supporting student well-being through an integrated network of care with a wide range of services to help students succeed. The MU Counseling Center offers professional mental health care and can help you find the best approach to treatment based on your needs. Call to make an appointment at 573-882-6601. Any student in crisis may call or go to the MU Counseling Center between 8:00 and 5:00, Monday through Friday. After-hours phone support is available at 573-882-6601.

Visit our website at <https://wellbeing.missouri.edu> (<https://wellbeing.missouri.edu/>) to take an online mental health screening, find out about workshops and resources that can help you thrive, or learn how to support a friend.

Academic Integrity

Academic integrity is fundamental to the activities and principles of a university. All members of the academic community must be confident that each person's work has been responsibly and honorably acquired, developed, and presented. Any effort to gain an advantage not given to all students is dishonest, whether or not the effort is successful. The academic community regards breaches of the academic integrity rules as extremely serious matters. Sanctions for such a breach may include academic sanctions from the Instructor, including failing the course for any violation, to disciplinary sanctions ranging from probation to expulsion. When in doubt about plagiarism, paraphrasing, quoting, collaboration, or any other form of cheating, consult the course instructor or the [Office of Academic Integrity \(https://oai.missouri.edu/\)](https://oai.missouri.edu/).

Students are expected to adhere to this honor pledge on all graded work, whether or not they are explicitly asked in advance to do so: "I strive to uphold the University values of respect, responsibility, discovery, and excellence. On my honor, I pledge that I have neither given nor received unauthorized assistance on this work."

Artificial Intelligence

AI tools are allowed for specific assignments and tasks in this course, as designated by the instructor and with appropriate citation. The content you submit is your responsibility. AI-generated content can be inaccurate, offensive, or biased. Your work must demonstrate your knowledge and avoid these pitfalls.

The use of generative AI tools (e.g., ChatGPT, Bard, Dall-e, Grammarly, etc.) is permitted in this course for the following:

- Checking your grammar and style.

For any use of AI tools, you must provide a statement noting the tool, how it was used, and the prompt(s). Maintain evidence of your work (drafts, notes, sources) to demonstrate originality. Violations of this policy will constitute an academic integrity violation under university rules.

Intellectual Pluralism

The University community welcomes intellectual diversity and respects student rights. Students who have questions or concerns regarding the atmosphere in this class (including respect for diverse opinions) may contact the departmental chair or divisional director, the [Office of Academic Integrity \(https://oai.missouri.edu/about/intellectual-pluralism/\)](https://oai.missouri.edu/about/intellectual-pluralism/), or the [MU Equity Office \(http://equity.missouri.edu/\)](http://equity.missouri.edu/)

Nondiscrimination Policy (Prohibited Discrimination)

The University of Missouri does not discriminate on the basis of race, color, national origin, ancestry, religion, sex* (including gender), pregnancy, sexual orientation, gender identity, gender expression, age, disability, protected veteran status, and any other status protected by applicable state or federal law. Discrimination includes any form of unequal treatment, such as denial of opportunities, harassment, and violence. *Sex discrimination includes rape, sexual assault, sexual harassment, unwanted touching, stalking, dating/domestic violence, stalking, and sexual exploitation. Retaliation for making or supporting a report of discrimination or harassment is also prohibited.

If you experience discrimination or sexual violence, you are encouraged (but not required) to report the incident to the MU Office for Civil Rights & Title IX. Learn more about your rights and options at [civilrights.missouri.edu \(https://civilrights.missouri.edu/\)](https://civilrights.missouri.edu/). Or call 573-882-3880. You may also make an anonymous report online.

If you are a survivor, or someone concerned about a survivor, and need immediate information on what to do, see [RSVP Resources page \(https://rsvp.missouri.edu/students/resources/\)](https://rsvp.missouri.edu/students/resources/). Both the [Office for Civil Rights & Title IX \(https://civilrights.missouri.edu/\)](https://civilrights.missouri.edu/) and the [RSVP Center \(https://rsvp.missouri.edu/\)](https://rsvp.missouri.edu/) can provide assistance to students who need help with academics, housing, or other issues.

In the event that you choose to write or speak about having experienced any of these forms of prohibited discrimination or harassment, Mizzou policies require that, as your Instructor, I share this information with the MU Office for Civil Rights & Title IX. They will contact you to offer information about resources, as well as your rights and options as a member of our campus community.

Academic Inquiry, Course Discussion, and Privacy

When students record something that happens in a course (a lecture, class discussions, meetings, etc.), it has an impact on the rights of the people captured in that recording. For example, the Instructor and the University may have rights to the intellectual property contained in that recording. At the same time, another student who may have been recorded has the right to privacy. In order to protect these rights, MU employs a policy (called ["Executive Order No. 38" \(https://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.015_academic_inquiry_course_discussion_and_privacy\)](https://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.015_academic_inquiry_course_discussion_and_privacy)) to govern both situations you may encounter while taking a course – when an instructor allows recordings and when they do not.

Instructors should inform students what applies to their course:

In this class, students may not make audio or video recordings of course activity, except students permitted to record as an accommodation under section [240.040](#) (http://www.umsystem.edu/ums/rules/collected_rules/programs/ch240/240.040_policy_related_to_students_with_disabilities) of the Collected Rules.

In this class, students may make audio or video recordings of course activity unless specifically prohibited by the faculty member. However, the redistribution of audio or video recordings of statements or comments from the course to individuals who are not students in the course is prohibited without the express permission of the faculty member and of any students who are recorded.

If the Instructor doesn't specifically prohibit recording course activity, then the students are allowed to record, and the same prohibitions regarding distribution apply.

Students who violate this policy are subject to discipline in accordance with provisions of [section 200.020](#) (http://www.umsystem.edu/ums/rules/collected_rules/programs/ch200/200.020_rules_of_procedures_in_student_conduct_matters) of the Collected Rules and Regulations of the University of Missouri pertaining to student conduct matters.

FERPA

The [Family Educational Rights and Privacy Act](#) (<https://registrar.missouri.edu/policies-procedures/ferpa/>) (FERPA) of 1974 is a federal law designed to protect the privacy of educational records; to establish the rights of students to inspect and review their education records; and to provide guidelines for the correction of inaccurate and misleading data through informal and formal hearings. The law applies to any individual who is or has been in attendance at an institution *and* regarding whom the institution maintains educational records. Once students have matriculated to the University of Missouri, i.e., enrolled in coursework, FERPA rights transfer to the student, regardless of the student's age.

Students can enable certain individuals to access their education records by signing a [FERPA waiver](#)  (<https://registrar.missouri.edu/policies-procedures/ferpa/>). The consent must specify the records to be disclosed, state the purpose of the disclosure, and identify the party or class of parties to whom the disclosure must be made.

Course Summary:

Date	Details	Due
Tue Jan 20, 2026	 January 20: Online Synchronous and Face-to-Face Class discussions (https://umsystem.instructure.com/courses/396063/assignments/3560105)	due by 11:59pm
Tue Jan 27, 2026	 Critical Analysis One (https://umsystem.instructure.com/courses/396063/assignments/3560038)	due by 4pm
	 January 27: Online Synchronous and Face-to-Face Class discussions (https://umsystem.instructure.com/courses/396063/assignments/3610898)	due by 11:59pm
Tue Feb 3, 2026	 February 3: Online Synchronous and Face-to-Face Class discussions (https://umsystem.instructure.com/courses/396063/assignments/3610899)	due by 11:59pm
Tue Feb 10, 2026	 Critical Analysis Two (https://umsystem.instructure.com/courses/396063/assignments/3560040)	due by 4pm

Date	Details	Due
	 February 10: Online Synchronous and Face-to-Face Class discussions https://umsystem.instructure.com/courses/396063/assignments/3610927	due by 11:59pm
Tue Feb 17, 2026	 February 17: Online Synchronous and Face-to-Face Class discussions https://umsystem.instructure.com/courses/396063/assignments/3629923	due by 11:59pm
Tue Feb 24, 2026	 Research Project Proposal https://umsystem.instructure.com/courses/396063/assignments/3579992	due by 4pm
	 February 24: Online Synchronous and Face-to-Face Class discussions https://umsystem.instructure.com/courses/396063/assignments/3630883	due by 11:59pm
